Health Impact Assessment: A Toolkit for Community Based Planning was co-authored by Rajiv Bhatia and Kim Gilhuly for Human Impact Partners with support from the Transportation and Land Use Coalition (TALC). The California Endowment provided part of the financial support for this publication.

The toolkit has borrowed from and adapted methods for HIA developed and used by the San Francisco Public Health Department, the University of California at Berkeley Health Impact Group, and Human Impact Partners.

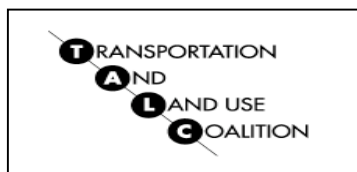

Table of Contents

Introduction and Overview	1.1
Section 1: Background	1.1
Why Conduct a Health Impact Assessment?	1.2
